TITLE : ELECTRONIC STILL CAMERA

ABSTRACT : PURPOSE: To immediately and easily set and adjust a camera image pickup operation unique to the user by providing a setting information write means and a setting information read means reading setting information from a storage means to the camera.

CONSTITUTION: The camera is provided with various setting switches 11 relating to the image pickup operation, a write switch 9 writing setting data set by an entry means to a memory card 6, and a read switch 10 reading the setting data written in the memory card 6 conversely into the storage means. The setting data of the camera set by the setting switch 11 and the entry means are stored in the memory card 6 by operating the switches as above and the setting data of the camera recorded together with image pickup picture data are read from the memory card 6 into the camera. Since a control part 7 picks up an image based on the setting data, it is not required to confirm various setting of the camera and the image pickup preparation is immediately finished.
